SUMMARY

Data Engineer with 4.5 years of experience building scalable data platforms and delivering advanced analytics across financial services and enterprise modernization initiatives. Proven expertise in designing end-to-end ETL pipelines, cloud data warehouses, and AI-ready datasets using Python, SQL, Spark, Azure, AWS, DBT, and Airflow. Strong background in exploratory data analysis, feature engineering, anomaly detection, and predictive modeling to generate actionable insights for risk monitoring, settlement systems, and business optimization.

SKILLS

Programming & Data Analytics: SQL (advanced queries, window functions, optimization), PL/SQL, Python (pandas, NumPy, matplotlib, scikit-learn, SciPy, Statsmodels), R (statistics, time series, clustering), Feature Engineering, Predictive Analytics, Forecasting, Time Series (ARIMA, Prophet)

Data Science & Advanced Analytics: Exploratory Data Analysis (EDA), Data Cleaning & Preprocessing, Statistical Modeling & Inference, Machine Learning (Regression, Classification, Clustering), Model Evaluation & Validation, Feature Selection, Dimensionality Reduction (PCA), Anomaly Detection, Experiment Design, Causal Analysis, Model Interpretability (Feature importance, SHAP)

Data Engineering & Cloud: ETL workflows, DBT, Azure Synapse, BigQuery, AWS, Azure, Spark, Hadoop, Data Lakes (Parquet, Delta Lake), Data Warehousing (Star & Snowflake Schema), Orchestration (Airflow, Prefect), Data Governance, Metadata Management

Analytics & Business Methods: A/B Testing, Hypothesis Testing, Regression, Forecasting, Financial Modeling, BPMN 2.0, BRD/FRD, Process Mapping, Gap Analysis, Workflow Automation, Agile/Scrum (sprints, backlog, stakeholder demos), Cross-functional Stakeholder Management

Visualization & Business Intelligence: Tableau, Power BI (Power Query, DAX, KPI dashboards), Looker Studio, Data Storytelling

Tools & Platforms: Jira, Confluence, Visio, Jupyter, Google Colab, VS Code, Git/GitHub

Soft Skills: Stakeholder Communication, Critical Thinking, Problem Solving, Adaptability, Cross-functional Collaboration

WORK EXPERIENCE

Data Engineer

Jun 2024 – Present | Atlanta, GA

Northern Trust

- Built and optimized scalable ETL pipelines using Python, Spark, Azure Synapse, and Airflow to streamline settlement data flows for the TCS BaNCs Global Securities Platform helping assets under custody/administration grow 5% year-over-year.
- Designed secure data ingestion and processing workflows for Project Acacia with Swift using Delta Lake and BigQuery to make integration between traditional finance and blockchain systems smooth and reliable.
- Ran deep exploratory analysis, feature engineering, and anomaly detection on huge financial datasets with advanced SQL, Python, and statistical modeling powering AI-enhanced predictive insights for risk monitoring, securities settlement, and investment performance tracking.
- Developed modern data warehouses (Star/Snowflake schemas) on Azure/AWS clouds with DBT for solid governance and data quality delivering clean, reliable data to document digitization projects, and client analytics.
- Created clear, user-friendly Power BI and Tableau dashboards for stakeholders highlighting KPIs, A/B test results, and straightforward data stories from digital transformation efforts.

Data Analyst

May 2020 – Dec 2022 | Hyderabad, India

Hexaware

- Developed advanced SQL queries and Python scripts for exploratory data analysis and predictive modeling fueling Hexaware's GenAI initiatives that helped scale AI pilots into enterprise solutions.
- Designed ETL workflows and data preprocessing pipelines using Azure Synapse and DBT accelerating cloud data modernization through Amaze® platform, cutting migration time by up to 50% and enabling faster AI-ready data.

- Performed EDA on large banking and legacy modernization datasets by visualizing patterns and trends using seaborn and Plotly interactive dashboards revealing inefficiencies that drove Tensai® automation, achieving 70% manual effort reduction.
- Built interactive Power BI and Tableau dashboards with DAX, KPIs, and clear data storytelling, A/B testing outcomes, and performance insights.
- Led Agile processes via Jira/Confluence, performed gap analysis, hypothesis testing, and stakeholder demos, aligning data analytics solutions with Hexaware's strategy.
